

Why can't we go out to eat at my favorite restaurant?

We all like to go and eat at our favorite restaurants.

But right now, our WORLD is experiencing a pandemic called Covid-19.

The pandemic is called Covid-19, it is a sickness that is everywhere in the WORLD.

This sickness is easily given to another person just by being close to them or even breathing on them.

This sickness can be spread or given to another person like our friends or family by shaking hands, hugging or touching a surface where a sick person has been.

This sickness can sometimes be in the restaurant that we like to go to because of the people who work there.

Not being able to go to our favorite restaurant can make us sad and sometimes even mad and that's alright, everyone is feeling the same thing.

When we follow the rules, wear our masks, keep six-feet apart and wash our hand, the pandemic will go away.

When the pandemic goes away, we will be able to go back to our favorite restaurant and eat.

Everyone will be happy when we all follow the rules so we can go back to our favorite restaurant.
